

March 30th, 2023

Memorial University of Newfoundland,
Department of Computer Science,
Co-operative education office,

Dear Rebecca Newhook,

I am writing to express my interest in The Co-operative Internship in Computer Science (CICS) program, which is set to commence in September 2023. As a computer science undergraduate with a passion for technology and an ardent desire to gain practical experience in the field, I am eager to become a part of this program.

Currently enrolled in the Bachelor of Science with a major in Computer Science at Memorial University of Newfoundland, I have consistently demonstrated academic excellence and have been honored to be on the Faculty of Science Dean's List for the 2021-2022 academic year. I have also been awarded The Memorial University of Newfoundland International Entrance Scholarship in recognition of my academic achievements. In addition to my academic achievements at Memorial University of Newfoundland, I would like to highlight my performance in high school. I scored 94% in the Grade 12 board examination, which was the highest marks achieved in the Gurdaspur district of Punjab, India.

I have gained hands-on experience through multiple projects, such as SocialMedia and WeatherApp. SocialMedia is a project that connects people from all over the world through messaging, group chat, and the ability to upload and share posts. Similarly, WeatherApp is an Android application that assists people in selecting the best day for an outing by analyzing future weather data. Moreover, WeatherApp is now available on the Play Store and has received positive feedback from users for its user-friendly interface and accurate weather predictions.

In addition, I have experience working as a Computer Science Help Centre Tutor at Memorial University of Newfoundland, where I helped students with their coursework in Java, Python, and other related topics. This role has allowed me to develop excellent communication skills, which I believe will be valuable in a co-operative education setting.

I am excited about the opportunity to combine my in-class learning with industry experience through the CICS program. I believe that the program's collaborative efforts between the Department of Computer Science, the co-operative education office, and employers will provide me with valuable opportunities to apply my skills and learn from experienced professionals in the field.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further and would be available for an interview at your convenience.

Sincerely,
Taranpreet Singh
